## CALIFORNIA CURRENT POPULATION SURVEY REPORT: MARCH 2003 DATA

The Current Population Survey (CPS) is conducted monthly by the U.S. Census Bureau for the Bureau of Labor Statistics. Although its main purpose is to collect information used to produce employment statistics, an important secondary purpose is to collect information on the demographic and economic status of the population. This is accomplished through supplemental questions in the March survey. The CPS targets a sample of almost 50,000 civilian non-institutional households in the U.S., of which about 5,600 are in California.

### DATA LIMITATIONS

The survey's estimation procedure uses independent samples for each state and inflates sample-weighted results to independent national estimates of the civilian non-institutional population by age, sex, race, and Hispanic origin. Due to the unique sample design and weighting procedures used in the March Supplement of the CPS, the population estimate for the state is not consistent with current population estimates produced by either the U.S. Census Bureau or the California Department of Finance (DOF).<sup>1</sup> For further information on sample design and sampling criteria please refer to "Technical Paper 63RV: Current Population Survey - Design and Methodology," issued March 2002 at <http://www.bls.census.gov/cps/cpsmain.htm>.

**All estimates developed from the CPS are subject to sampling error.** The magnitude of the error is inversely related to the size of the population being estimated.

***Estimates of 100,000 or less have large standard errors and are denoted with italic type.***

### USER'S NOTE

Race/ethnicity tables were constructed using mutually exclusive categories. The response to the Hispanic origin question took priority when determining race/ethnicity resulting in Hispanic and non-Hispanic categories. The non-Hispanic categories are: White, Asian, Black, American Indian/Alaskan Native, Hawaiian/Pacific Islander, and Two or More Races. Persons identifying more than one race were, unless otherwise stated, tabulated within the Two or More Races category and not within their chosen race groups. The Hispanic category includes persons of Spanish, Hispanic or Latino origin who may be of any race.

Numbers of persons, families, and households are rounded to the nearest thousand. Dollar amounts are rounded to the nearest hundred. All percentages are calculated on the unrounded numbers.

**Individual components may not sum up to totals because of independent rounding.**

More information on the March Supplement of the Current Population Survey can be obtained from <http://www.bls.census.gov/cps/ads/adsmain.htm>.

---

<sup>1</sup>The CPS and DOF estimates should not be expected to be the same. The CPS estimate is for the civilian non-institutional population (and also includes military personnel living off-base or in civilian housing on-base), while the DOF estimate is for the entire resident population of the state.

\*A household consists of all persons who occupy a house, apartment, or other group of rooms which constitutes a housing unit, while a family is a group of two or more persons (one of whom is the householder) residing together and related by birth, marriage, or adoption.

\*\*Total also includes all race/ethnic groups.

\*\*\*Data should be used with caution with income levels below \$10,000 due to small sample size.
